Three days trip

THE FIRST DAY

We will start our drive from Tbilisi to Borjomi, by a luxurious air - conditioned minibus, a 160 km journey, approximately 3 hours' drive. Borjomi, which is a beautiful resort and healing town in Georgia, is well known for its Mineral spring water for their healing properties for body and soul. Upon arrival, the company's representatives will then explain and give a safety briefing, regarding the Can Am Maverick X3 vehicles, the latest company's purchase, especially for this project. In beautiful Borjomi we will have a delicious lunch, in a restaurant with a variety of dishes: meat, dairy and Vegetarian delicious food.

Thereafter we will continue driving the vehicles to Tabatskuri lake, through amazing mountain views, about 1500 meters climb. This pristine blue lake is in the small Caucasus. Next to it there is a small village with most of its Armenian inhabitants, yet it gives a sense of distance from civilization. You can see the small island in the middle of the lake, and the impressive mountains around it - some are inactive volcanoes. Then we will enjoy more of this breathtaking nature, by driving the SBSs back to the hotel in Borjomi. Upon arrival, we will have a splendid dinner, filled with the authentic atmosphere.

Three days trip **THE SECOND DAY**

After a healthy breakfast in the hotel, the minibus will drive us to Borjomi Kharagauli National Park, which is a protected area in the center of Georgia, located on the small Caucasus Mountains. This is one of the largest national parks in Europe. The uniqueness of the National Park is the diversity of its geographical and ecological regions, landscapes, historical sites and rich flora and fauna. Thereafter We will enjoy the experience of driving the vehicle called EZraider: an electric and exciting off-road vehicle (used by Israeli and the United States armies, for special activities that involve complex terrains). Later we will have a perfect lunch in nature on the riverside, in an incredible landscape. We will have a freshly cooked kalmakhi, a grilled cold river fish, considered a delicacy among local people.

After some relaxation time, we will continue to a superb adventure: horseback riding in the park! With the help of with this beautiful and noble animal, we will ride among the woods and be excited to see, in a panoramic viewpoint, the impressive mountains in a celebration of nature. After that, we will visit Gogia Fortress, which is located on the Mtkvari River and overlooks the entire city. The fortress was built in the 16th century and is one of the historical monuments located on the territory of Borjomi. The fortress can be seen from almost anywhere in the valley. Afterwards we will return by our minibus to the hotel in Borjomi for a fine dinner and some free time for a stroll through the alleys of the city.

Three days trip

THE THIRD DAY

After a tasty breakfast at the hotel, we will go rafting on the Mtkvari River, where we will be guided by qualified instructors. This activity is an adventure sport, full of adrenaline and memorable experiences and followed by an appetite to have a lovely lunch and time to soothe the beating heart. And if all this is not enough, we will climb once more aboard our SBS's, about two and a half hours ride in a hypnotic landscape, until we reach the caves of Vardzia. Vardzia is a spectacular cave monastery in southern Georgia. It is the home of many monks on an extremely fertile land. This underground monastery was built in the 12th Century, under the reign of King Tamar, the first woman that was ever crowned as a king (not a queen!) in Georgian history. It was built with hard work and determination of the people so that the Georgian culture and lifestyle should not be destroyed by the planned invasion of the Mongols. In 1283, only 100 years after its construction, a devastating earthquake literally ripped the place apart and destroyed more than two-thirds of the city and the remaining caves that were once hidden became visible. Don't forget to bring some chewing gum with you when you visit Vardzia. There is a special 'bubble gum tree' where people make a wish and stick their chewing gum to the tree. The unique advantage of our company over all other companies, is that we send our vehicles by a large carrier and thus enable our customers to enjoy a full day of activities, instead of wasting time on riding/driving back to meet the deadline. Finally, the minibus will bring us back to the starting point in Tbilisi and we can guarantee to all our customers an experience that will forever engrave in their memory.

*Required equipment for off road driving: a small bag with warm clothing, extra change of clothes, comfortable and high closed shoes, a hat and some chewing gum (optional).

*Each participant will independently purchase an Extreme Insurance, prior to the trip.

Prices vary depending on the size of the group, availability and seasonal changes.
